Internal Diameter Tolerance: H8

Outside Diameter Tolerance: f7

Thickness Tolerance: + / - 3%

Internal roughness: Ra - max. 0,40 μm

Outside Surface roughness: Ra - max. 0,20 μm (statistical average 0,05 – 0,15 μm)

Chromium Hardness: min. 900 HV

Diameter Range: outside diam. 30- 100 mm(others on request)

Thickness Range: 3 / 3,5 / 4 / 5 / 6 / 7,5 mm (others on request)

Bars length: 4000 / 12.000 mm

Eddy current test: 100% checked found ok

Marking: Dimension - Heat treatment- Steel grade- Heat number & Logo

Protection: PVC or cardboard tube otside, oiled inside, cap on the head

General properties and applications

Chromed outside honed H8 insideTUBES are used for telescopic hydraulic cylinders. The chromed surface is resistant to corrosion and wear. The internal cold drawn process is a complex and that increases the roughness quality of the surface and creates an internal mirror surface.
